Dear Sirs:

I am interested in expanding the scope of my research, on RNA processing, into several areas that might be of interest to you. These include the formation of the intestinal form of apolipoprotein B, B-48 (due to post transcriptional processing of the apoB mRNA) and the alteration of mRNA processing in cancer cells.

Would you therefore please send me full information and an application form for a research project grant sponsored by your foundation.

Thank you very much.

Sincerely,

James E. Dahlberg  
Professor  
Department of Physiological Chemistry
